

Bringing CS to Your District

A Possible Track of CS Courses

Overview of Session (12:45 - 2:10 PM)

I. Welcome and Introductions (5 minutes)

II. Course overviews (20 minutes each)

- Exploring Computer Science (non AP)
- Computer Science Principles (AP or non AP)
- Computer Science A (AP)

III. Panel (20 minutes)

IV. Professional Development Opportunities

A Possible Track of CS Courses

Exploring
Computer
Science

CS
PRINCIPLES

AP CS A

Exploring Computer Science (non AP)

- Overview of the course
- Who should take this course?
- What might a lesson from this course look like?
- Who can teach this course?
- Where can the resources be found?

[ECS Slides](#)

Computer Science Principles (AP or non AP)

- Overview of the course
- What might a lesson from this course look like?
- Where can the resources be found?
- Who should take this course? It's a bridge between the courses
- Who can teach this course?
- AP vs Non AP perspectives

CSP Overview

The AP CS Principles Project (

<http://apcsprinciples.org/>)

- New College Board Advanced Placement course 2016-2017 - Largest course launch in AP history
- Broad introduction organized around 7 Big Ideas
- Intended to appeal to girls and underrepresented minorities

Seven Big Ideas of CSP

CSP Assessments

Explore - Impact of Computing Innovations	16%
Create - Applications from Ideas	24%
AP CSP Exam - Language Neutral, 2 hrs, 74 multiple choice questions	60%

Teach AP CSP

Endorsed Providers

- Beauty and Joy of Computing (BJC) (SNAP)
- **CodeHS (Block based and text based JavaScript)**
- Code.org (App Lab/JavaScript)
- Computer Science (CS) Matters (Python)
- CS50 (Scratch/C)
- **Mobile CSP (App Inventor)**
- Project Lead the Way (PLTW) (Python/App Inventor)
- **UTeach CS Principles (Scratch)**

Right people...right support...it WORKS!

Computer Science A (AP)

- Overview of the course
- Who should take this course?
- What might a lesson from this course look like?
- Who can teach this course?
- Where can the resources be found?

AP CS A Overview

- Problem solving / Design solutions
- Implement programs to solve variety of problems
- Emphasis on object-oriented problem solving and design using Java language
- Open to all students, but students should have a strong background in mathematical reasoning and functions (Algebra II)
- Equivalent to a first year college computer science course for CS majors

A look at a sample lesson

Lessons scaffold - start with basic coding constructs

```
public void broadcastMessage(String message,
                             ArrayList<String> members){

    String addresses = " ";

    for (String address:members)
        addresses = addresses + ", " + address);

}
```

Replace

Restart

43 undealt cards remain.

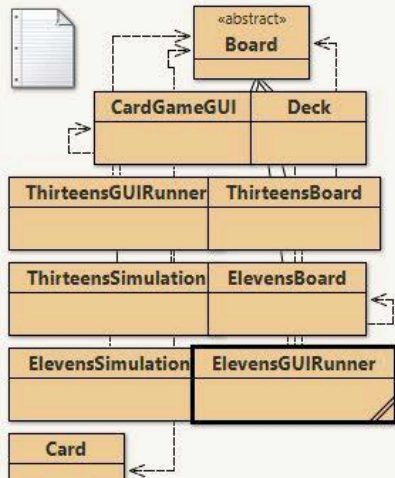

You've won 0 out of 0 games.

Source Code

```

63         return pointValue;
64     }
65
66     /** Compare this card with the argument.
67     * @param otherCard the other card to compare to this
68     * @return true if the rank, suit, and point value of this card
69     *         are equal to those of the argument;
70     *         false otherwise.
71     */
72     public boolean matches(Card otherCard) {
73         return otherCard.suit().equals(this.suit())
74             && otherCard.rank().equals(this.rank())
75             && otherCard.pointValue() == this.pointValue();
76     }
77
78     /**
79     * Converts the rank, suit, and point value into a string in the format
80     * "[Rank] of [Suit] (point value = [PointValue])".
81     * This provides a useful way of printing the contents
82     * of a <code>Deck</code> in an easily readable format or performing
83     * other similar functions.
84     *
85     * @return a <code>String</code> containing the rank, suit,
86     *         and point value of the card.
87     */
88     @Override
89     public String toString() {
90         return rank + " of " + suit + " (point value = " + pointValue + "
91     }
92 }
93

```

What is required to teach CS A?

- Teacher should have Java (object oriented language) coding experience
- Desktop or laptop computers with Java editor and Java development software (both free to download)

Panel

- Moderator: Pauline Lake (Trinity College)
- ECS and CSP Teacher: Seymour de Oliveira (Great Path Academy, Hartford)
- CS A and CSP Teacher: Melissa Fearington (Simsbury High School, Simsbury)
- ECS and CSP Teacher: John Tusch (Global Communications Academy, Hartford)
- ECS and CSP Teacher: James Veseskis (Hartford Magnet Trinity College Academy, Hartford)

Possible Panel Questions

1. Question about being a pioneer CS teacher in your district - What is your background? Where did you start? What successes have you and your students had?
 - a. ALL
2. What advice or suggestions would you give to other districts looking to start a CS track?
 - a. Jim, John (speak to funding and equipment)
3. How did you recruit students to join your class? First state which class.
 - a. Seymour, Jim
4. How do you build equity in all of these courses?
 - a. Jim
5. If you taught CS A before CSP, why did you decide to also teach CSP and what impact, if any, has it had at your school?
 - a. Melissa
6. If you taught CSP before ECS, why did you decide to also teach ECS and what benefit did it have for your students?
 - a. Jim, Seymour
7. If you currently teach ECS, do you think your ECS students are ready to go directly into CS A? Why or why not?
 - a. John
8. What PD opportunities are available?
 - a. Speak to the importance of community

Thank you!
